Inspiration On and Off the Road

My company, Intouch Solutions, embarked on a unique Airstream journey in 2016. We outfitted a Flying Cloud 26U as a mobile video studio and visited health-related walks and runs around the country. There, we interviewed people about their health challenges — folks who have lived through major adversities: multiple sclerosis, leukemia, Crohn's disease, diabetes ... (see TeamALLin.com for photos/videos).

We knew we'd be inspired by their stories. What we didn't expect was that the #ALLin Airstream would also spark inspiration in places such as the Chicago yacht yard where it's stored for the winter!

We were delighted to see Leslie Travis' letter in the Winter 2016 issue of *Airstream Life*, and to learn that she saw it as a cosmic sign pointing her to more Airstream experiences in her future! Here's to finding inspiration in unexpected places, and to many more Airstream-inspired adventures ahead.
